

# POWERMAX DISTRIBUTORS!

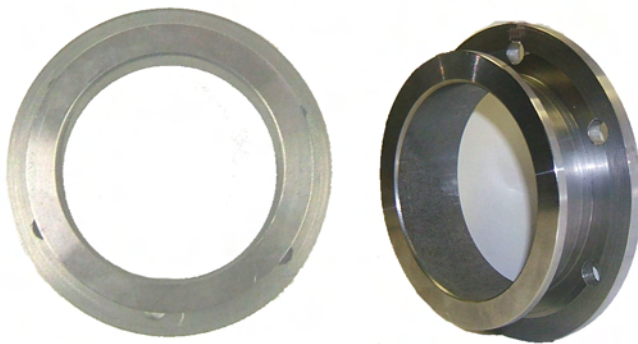

**New Adaptor For Dodge Cummins PowerMax kits!**

**Do you have customers that want additional performance from their PowerMax? If they have replaced their exhaust, the stock Garrett cast elbow might not fit your customers' performance exhaust.**

## ADS5037

**Area Diesel Service has designed an adapter that will allow you to use the HX40 downpipe and clamp with the PowerMax turbo. This adapter works in place of the Garrett cast elbow that connects the turbo to the stock exhaust. Now your customers can enjoy the benefits of the combined power of the PowerMax turbo with a performance exhaust system!**

**Works on PowerMax Stage 1, 2, or 3!**

**Give your customers more performance with their PowerMax turbo!  
Call us today for more information.**
